Spirits Turpentine, 52 cents.

Basis For Naval Stores Statistics.
A wholesale lumber dealer in Georgia asks:

"In making up statistics for naval stores please advise how many pounds of rosin and number of gallons of turpentine you figured."

The basis upon which all figures of naval stores are compiled is 380 pounds of rosin per barrel, and 50 gallons of turpentine. The barrels of rosin vary greatly, but the price is based on 280 pounds, and, of course, the exports and other statistical information are based on the same quantity. Turpentine barrels do not vary so greatly, and as the average is 50 gallons, that amount is taken as the quantity per barrel.—Jacksonville Industrial Record.

McEachern on the Herty Cup.

Mr. H. A. McEachern, vice-president of the Consolidated Naval Stores Co., was seen by a Record reporter and asked for an expression relative to the Herty cup since the freeze. Mr. McEachern said: "It is fortunate that this test has come at this time. If we had gone on for a year or two more without a freeze and the lesson it brings, it would have been a calamity when it did come. Now we have learned a lesson and all we have to do is to heed it. The operator must learn to take care of his cups as he does his other valuables. The man who leaves his water pipes full of water during a freezing night finds them burst next day and if he is a prudent man, he will not take the risk, but prepare before hand. Just so the operator must prepare for freezes. Cups should all be taken down by December 15th each season and left down till February 15th. Then the danger would be over. It would not cost much to take them down, nor put them up, nor would the dripping during the two months amount to much of anything. The sooner we learn to appreciate our property so that we will properly care for it the better off we will be. It is a hardship on a few operators, but in the long run it is a blessing, and especially if we will all improve the lesson. The cup system is here to stay and will not be set back on account of the recent freeze to any appreciable extent."—Industrial Record.

MEETING OF THE COUNTY BOARD OF INSTRUCTION

WAS HELD YESTERDAY, WHEN THE ROUTINE BUSINESS WAS TRANSACTED—BOARD COMPELLED TO NEGOTIATE FOR LOAN WITH WHICH TO PAY SALARIES.

The regular weekly meeting of the County Board of Public Instruction was held yesterday in the office of Superintendent Cook, with Chairman Clabbs, presiding. Considerable business was transacted during the session.

The pay roll of the teachers for the month of January was the first thing to be considered. It amounted to the sum of \$5,400, and was approved and ordered paid as soon as the amount necessary could be secured. The board decided upon borrowing the amount needed to cover the pay roll, and arrangements were made during the afternoon to secure the amount, making it payable ninety days from the date it is procured. By this time the board anticipates that ample funds will be on hand to meet the paper.

The board had sufficient funds on hand to meet the pay roll, but a note made some months ago, when no funds were on hand, became due, amounting to something over \$5,000, so the amount in the treasury was necessarily used to make this payment and another note had to be given.

The board is now only one month behind with its payments, and is in better condition than has been the case in many years past.

The resignation of H. J. Purcell, as school supervisor of Millville, was read and accepted.

The superintendent reported the loss of a school building by fire a few nights ago. Owing to the very severe weather steps have not yet been taken to secure another building.

Nonia Bloxham, colored, was appointed teacher of school No. 49.

Tax Collector Roberts reported that he had collected from the time he went into office up to February 1, 61 poll taxes.

Perfect Confidence.

Where there used to be a feeling of uneasiness and worry in the household when a child showed symptoms of croup, there is now perfect confidence. This is owing to the uniform success of Chamberlain's Cough Remedy in the treatment of that disease. Mrs. M. I. Basford, of Poolsville, Md., in speaking of her experience in the use of that remedy says: "I have a world of confidence in Chamberlain's Cough Remedy for I have used it with perfect success. My child Garland is subject to severe attacks of croup and it always gives him prompt relief." For sale by all druggists.

THAT SUN SPOT

Caused Wave of Superstition to Arise in Wicked Windy City.

Chicago, Feb. 8.—Everybody in Chicago, from the throngs in the streets to the workers in the great skyscrapers, turned their eyes upward today, either standing in the chill of the outer air or flattening their noses against well rubbed window panes, to see a black spot on the sun. It is one of the few times in history, men of science assert, that the unaided eye has beheld a sun spot of such magnitude. The spot, looking larger than the head of a tack, is estimated to be in reality more than 80,000 miles across, or about one-tenth the diameter of the sun itself.

The spot became visible when a heavy bank of smoke and cloud partially lifted, giving the city a natural "smoked glass" through which the sun shone with such reduced brilliancy as to make the black sea of trouble on its surface clearly visible.

"Have you seen the sun spot?" was the query that ran from lip to lip. It flew over the telephone wires and was shouted across streets. As the knowledge of the wonder grew, so increased the armies of the gazers, until the downtown streets were congested with thousands of men, women and children, all of whom seemed to have forgotten everything else in life. Then suddenly a wave of superstitious fear seemed to sweep over the multitude, causing hundreds of people to ask their neighbors, some jokingly, some seriously, whether "the end of the world" was presaged by the phenomenon.

"Its influence has been felt all over the earth," declared Prof. Cox, of the local weather bureau. "The howling blizzards in the northwest of this country and the frigidities in Russia and Northern Europe are due to this gigantic pimple."

VESSELS TO TAKE CARGOES AT PENSACOLA THIS MONTH.

The following vessels are under charter to the Gulf Transit Company, and will load cargoes at this port:

For Liverpool—Allicia, in port; Ida, due February 27; Vivina, due March 20; Gracia, due April 3; Leonora, due early in May.

For Genoa—Dubac, due February 12; Proteo, due February 18.

For Havre—Manchester Shipper or substitute, now in port.

For Bremen—Manchester Shipper or substitute, now in port.

For Fiume—Eros, now in port.

For Dunkirk—Telesfora, now in port.

For Runcorn—Mercedes de Larrinaga, now in port.

For Nilazzo—Dubac, due February 12.

For Venice—Proteo, due February 18.

For Trieste—Dubac, due February 12; Proteo, due February 18.

For Tampico—E. O. Saltmarsh, due February 15; August Belmont, due February 18.

Norma Martinez Smokers—A 10c cigar for 5c. Nick Apostle, Agent.

NAVAL STORES CUPS DESTROYED

FACTORS POINT OUT HOW DAMAGE CAN BE AVOIDED IN FUTURE WHEN FREEZING POINT IS REACHED.

The Savannah Naval Stores Review says:

Reports received by the Savannah factors from various producers during the past week indicate that fully one-half of all the cups used in the introduction of the Herty system were destroyed by the recent freeze. Fifty per cent. is regarded as a moderate estimate of the loss, which may run as high as 75 per cent. Not knowing the exact number put up it is impossible to estimate the exact loss, but the total number of cups ruined by the cold spell must have reached well up in the hundreds of thousands, perhaps even into the millions, as one firm in Alabama alone, as stated last week, lost nearly 150,000 cups, and several have reported losses of 50,000 cups or over.

Factors, though, take exception to our first theory that the losses caused by the freeze had dealt a death blow to the Herty cup system. It was the opinion of the Review, on first thought that producers hereafter would be unwilling to use cups with the fear of their total destruction by a blizzard at any time coming upon them. If the freeze this year had been four or five weeks later, and blizzards have been known even in early March, the unfortunate producers who had put up many crops of cups would have been unable to prepare for the next season's operations and would have lost, in addition to the cups and the expense connected with them, a total year's working of their farms.

Factors, however, point out that the Review was in error in this surmise, and that it is possible for the producers using the cups to avoid such a loss as came to them last week. The losses were caused, as stated, by the freezing of water in the earthenware cups, which resulted in the bursting of the cups, just as the lead pipes in a house burst when the water is not turned off in a freeze. The factors point out that this can be avoided if the producers will take off the cups as soon as the three stops running and turn them upside down at the base of the tree on which they were used. When the next spring comes around all that is necessary is to put the cups back into position on the trees. There may be some small breakage of cups on the ground, but it will be of slight consequence, and the system can be continued without the fear of a complete loss such as came upon a number a few days ago. Of course there would be an extra expense entailed by taking down and putting up the cups again and the danger of a late freeze could not be entirely avoided.

It is an open question whether the cups lost by the recent freeze can be replaced in time for the next season's work. The factors supplying these cups reported sometime ago that it was unable to fill any more orders. It is not too late, though, for the unfortunate producers to put hands to work cutting boxes in place of the cups, and they will no doubt resort to this if it is found that cups are not quickly available. There are still six or seven weeks during which boxes can be cut to advantage, and it is doubtful if the next season's crop will be affected to any extent at a result of the destruction of the cups.

It must not be overlooked by those not acquainted with the exact situation that cups cut but a small figure in the naval stores industry. The number in use looks large on paper, but their bearing on the total production is very slight. It is estimated that there are between 400 and 500 crops of cups in use. Accepting 450 crops as about a fair estimate, at 10,500 cups to the crop there would have been, before the freeze, 4,725,000 cups ready for the next season's operations. If one-half of these were destroyed the number buried by the freeze was about 2,362,500. A crop of Herty cups is said to produce, on virgin trees, about 50 casks of spirits. A destruction of 225 crops of cups would mean the cutting off of about 11,250 casks. But it is safe to say that fully half of this will be made up by the cutting of boxes and the cups that may yet be secured, so the total loss by the freeze, after all, will reduce itself down to probably 5,000 to 6,000 casks, which will hardly offset the increase expected from other causes.

About the Two-Cent Price.

DeFuniak Springs, Fla., Jan. 30, 1905. Editor Industrial Record:

In a recent number of the Record there is a communication from Mr. J. J. McDaniel, of Bear Head, Ala., which is all right as far as it goes, but he does not tell why we were forced to give two cents for cutting boxes, and makes it appear that we started this exorbitant price, which is not true. The Alford Bros. Co. (Inc.) of Chipley, Fla., the strongest firm of operators in West Florida, are the ones who first commenced to pay two cents for cutting and we were forced to give as much as they did, or lose some of our best hands. I am sure that the gentlemen who compose this firm have thought they had good reasons for giving two cents or they would not have done so. There is no such firm as Richardson & Thorp, or T. M. McConnell, as both of these firms were merged into the Walton Land & Timber Co. You will put the above in the proper shape and publish it so as to set us right with our friends. I am very much pleased with the Industrial Record and think it and the Association have done much good in our business. Very truly,
D. E. RICHARDSON.

Auction Sale!

...of...
FINE MILK COWS
...at...

1300 W. Garden Street,
corner of F.

Saturday
at 2:30 o'clock.

The entire stock of Milk Cows at dairy of W. T. Godwin will be sold to the highest bidder as above.

W. F. WILLIAMS,
Auctioneer.

MILTON.

Milton, Feb. 8.—The election on the question of bonding the town for \$8,500 for securing electric lights, water works, etc. was held yesterday, resulting as follows: Yes 31 No 25. Only 87 voters being registered and having to have two-thirds of that number, the vote was lost. Strangers coming to our town can now have the pleasure of falling over cans, stumps, etc. Oh, for a few more progressive citizens.

Mr. M. N. Fisher, Jr., and Miss Valie Mitchell were quietly married at the Methodist parsonage by Rev. W. T. Ellis. We wish them a long and happy life.

Mrs. C. B. McKinnon left Tuesday morning for an extended visit to relatives in DeFuniak.

Misses Clem and Emma Gentry, are in Pensacola, called there by the serious illness of their brother-in-law, Capt. Dave Wilson.

Mr. J. E. Potter, of Lucedale, Miss., is making his family a brief visit.

A protracted meeting will begin at the Baptist Church Sunday next. The pastor, Rev. J. A. Abbott will be assisted by Rev. Dr. Wagner, of DeFuniak.

Miss Blanche Wood was the guest of Miss E. A. Potter Sunday. Miss Wood will leave in a few days for her home in Bolivar, Tenn.

Mr. J. W. Brown, of Milligan, who has been attending the high school, left Tuesday morning for home.

Sick Headache.

This distressing ailment results from a disordered condition of the stomach. All that is needed to effect a cure is a dose or two of Chamberlain's Stomach and Liver Tablets. In fact, the attack may be ward off, or greatly lessened in severity, by taking a dose of these Tablets as soon as the first symptom of an attack appears. Sold by all druggists.

Late Dummy To-Night.

The Terminal Company will run a late dummy to-night to Port Barrancas, which will give those along the line an opportunity of visiting the city. The dummy on the return trip will leave the city at 11 o'clock.

THE ANT.

Facts About One of Nature's Most Industrious Creatures.

When spring comes with all its wealth of opening buds and new flowers, the ant is preparing for a season of profitable industry.

It comes out of its winter quarters and locates a new home where it can store away, during the summer months, the sustenance for the long winter days.

Just as industrious as the ant—but in a different way, are the countless—infinitesimal germs which burrow into the scalp and eat away at the roots of the hair.

As they burrow away dandruff forms, and if the germs are not all killed, baldness results.

Newbro's Herpicide is the only known remedy which kills the germs. Sold by leading druggists. For sale by W. A. D'Alemberte, druggist and apothecary, 121 S. Palafox. Send 10 cents in stamps for sample to The Herpicide Company, Detroit, Mich.

OVERCOATS for Little Boys

We have a number of exceedingly pretty Little Overcoats for the little men, from three to six years old. Some long and some short ones, several colors, and
